### Top Five Lowest Stages

Period of Record - 1931 to September 30, 2016

Date	Crest (ft)	Flow (cfs)	Remarks
2/22/1931	missing	4	Possibly incompatible with contemporary flows
10/2/1942	missing	5	Possibly incompatible with contemporary flows
9/13/1980	missing	8	Possibly incompatible with contemporary flows
1/6/1999	0.72	missing	Questionable - Data is limited for this time frame. Also occurred 1/5/1999 possibly ice effects.
9/26/2002	1.02	51	Also occurred 8/6/2002

### Additional Low Stage Information

Date	Crest (ft)	Flow (cfs)	Remarks
10/7/1997	1.05	missing	none
8/5/1999	1.08	missing	none
9/13/2016	1.53	83	Also occurred 9/7/2002

### Additional Remarks

Low water records are somewhat limited. Therefore some low stages could be missing. Our low stage listing includes valid and sometimes questionable stages. In some cases we have a brief list of questionable stages since it was unclear if the readings were due to a gauge malfunction or there wasn't enough data to determine its validity. Low stage (if found) are listed if there hasn't been any low stages in the last 15 years. The USGS sometime tweak their readings so please contact the USGS if you need more information.
